John Doe

john.doe@example.com | +1 555 010 0199 | GitHub | LinkedIn | Portfolio

TECHNICAL SKILLS

Languages: Python, Go, TypeScript, SQL, Bash

Backend & Data: FastAPI, Django, gRPC, PostgreSQL, Redis, Kafka, Elasticsearch

AI / ML: LLM APIs, RAG, Embeddings, Evaluation Harnesses, Prompt Engineering

Cloud & DevOps: AWS (ECS, Lambda, RDS, S3), Docker, Kubernetes, Terraform, GitHub Actions, Prometheus, Grafana

WORK EXPERIENCE

Acme Corp — Mar 2023 – Present

Senior Software Engineer | San Francisco, CA (Hybrid)

- Led the redesign of the **order-processing service** (Go, **Kafka**, PostgreSQL), cutting **p99 latency from 1.2s to 180ms** and handling **3x peak traffic** during seasonal sales without new hardware.
- Built an **LLM-powered support triage pipeline** with retrieval over 40K help articles and an **offline evaluation harness**, routing **62% of tickets** automatically at **95% precision**.
- Introduced **SLO-based alerting** with Prometheus and Grafana across 14 services, reducing pager noise by **70%** and mean time to recovery from 48 to **12 minutes**.
- Mentored **4 engineers** and ran the backend design-review forum, standardising API versioning and idempotency patterns.

Globex Analytics — Jul 2020 – Feb 2023

Software Engineer | Austin, TX (Remote)

- Developed a **multi-tenant reporting API** (Python, **FastAPI**, Elasticsearch) serving **2M+ queries/day** for 300 enterprise customers, with per-tenant rate limits, caching and audit logging.
- Migrated nightly batch ETL to **event-driven ingestion** on AWS Lambda and S3, cutting data freshness from 24 hours to **under 5 minutes** and removing a 6-hour maintenance window.
- Cut monthly **AWS spend by $18K** through right-sizing RDS instances, S3 lifecycle policies and reserved capacity.

Initech — May 2019 – Aug 2019

Software Engineering Intern | Seattle, WA

- Built a **feature-flag service** (Django, **Redis**) adopted by 6 product teams, enabling gradual rollouts and instant kill switches.
- Added **contract tests** to the payments client, catching 9 breaking changes before release.

PROJECTS

LedgerLite — https://example.com/johndoe/ledgerlite

Open-source double-entry bookkeeping API in **Go** with **event sourcing**, **PostgreSQL** projections and a **TypeScript SDK**; 1.2K GitHub stars and 30+ contributors.

PaperTrail — https://example.com/johndoe/papertrail

Semantic search over research papers using **embeddings**, **hybrid BM25 + vector ranking** and a small **RAG** answer layer; evaluated on 500 labelled queries (**nDCG@10 0.71**).

EDUCATION

State University — Aug 2016 – May 2020

B.S. in Computer Science, GPA 3.8/4.0

- Coursework: Distributed Systems, Databases, Machine Learning, Algorithms. Teaching assistant for **Operating Systems**.

ACHIEVEMENTS

- **1st place**, Acme internal hackathon 2024: on-call assistant that summarises incidents from logs and runbooks.
- Speaker at **GopherCon 2023**: "Backpressure patterns for Kafka consumers in Go".
